Blackjack 1-on-1 without betting (optional)

DESCRIPTION

As an enterprising KfK gambler
I want to play blackjack for fun against the dealer
So I can get familiar with the rules

LABELS

blackjack

TASKS (0/10)

☐ The player and dealer are each dealt 2 cards to start. Only one of the dealer's cards are showing.

☐ The player may hit or pass

☐ If the dealer is dealt a blackjack, the human player loses

☐ If the human player is dealt a blackjack (and the dealer isn't), the human player wins

☐ If the player hits, the bust conditions are re-checked

☐ The player may continue to hit until busting or passing

☐ When it is the dealer's turn, the dealer hits until at least 17

☐ If the dealer has 17 and an ace (that is currently counting as 11 points), the ace is treated as if it is only 1 point (it's a "soft" 17).

☐ An ace counts as 1 or 11, whichever is more advantageous

☐ The player's card points total(s) is shown on each re-render
